## 1. Intro

Millions of humans are interested in comics: reading magazines, watching movies, playing games and talking with friends about their beloved protagonists. All those people are potential users for our **CryptoComics** project.

**CryptoComics** is an ecosystem for comics creators and comics lovers.

## 2. CryptoComics Ecosystem

### 2.1 Overview

We are working on creating an ecosystem for everyone connected with comics, and we are faced with the task of making sure that the user will get access to everything that interests him in the world of comics when he comes to us.

The whole ecosystem is built on the basis of the Ethereum network, and web3 allows you to get new experiences and opportunities for both comics creators and users

In order to realize this, we are creating various services that will be gazed into one common ecosystem with the unified economic model. The economy of the project will be based on our token **CCM**. The economy is built in such a way that both content creators and the users can earn.

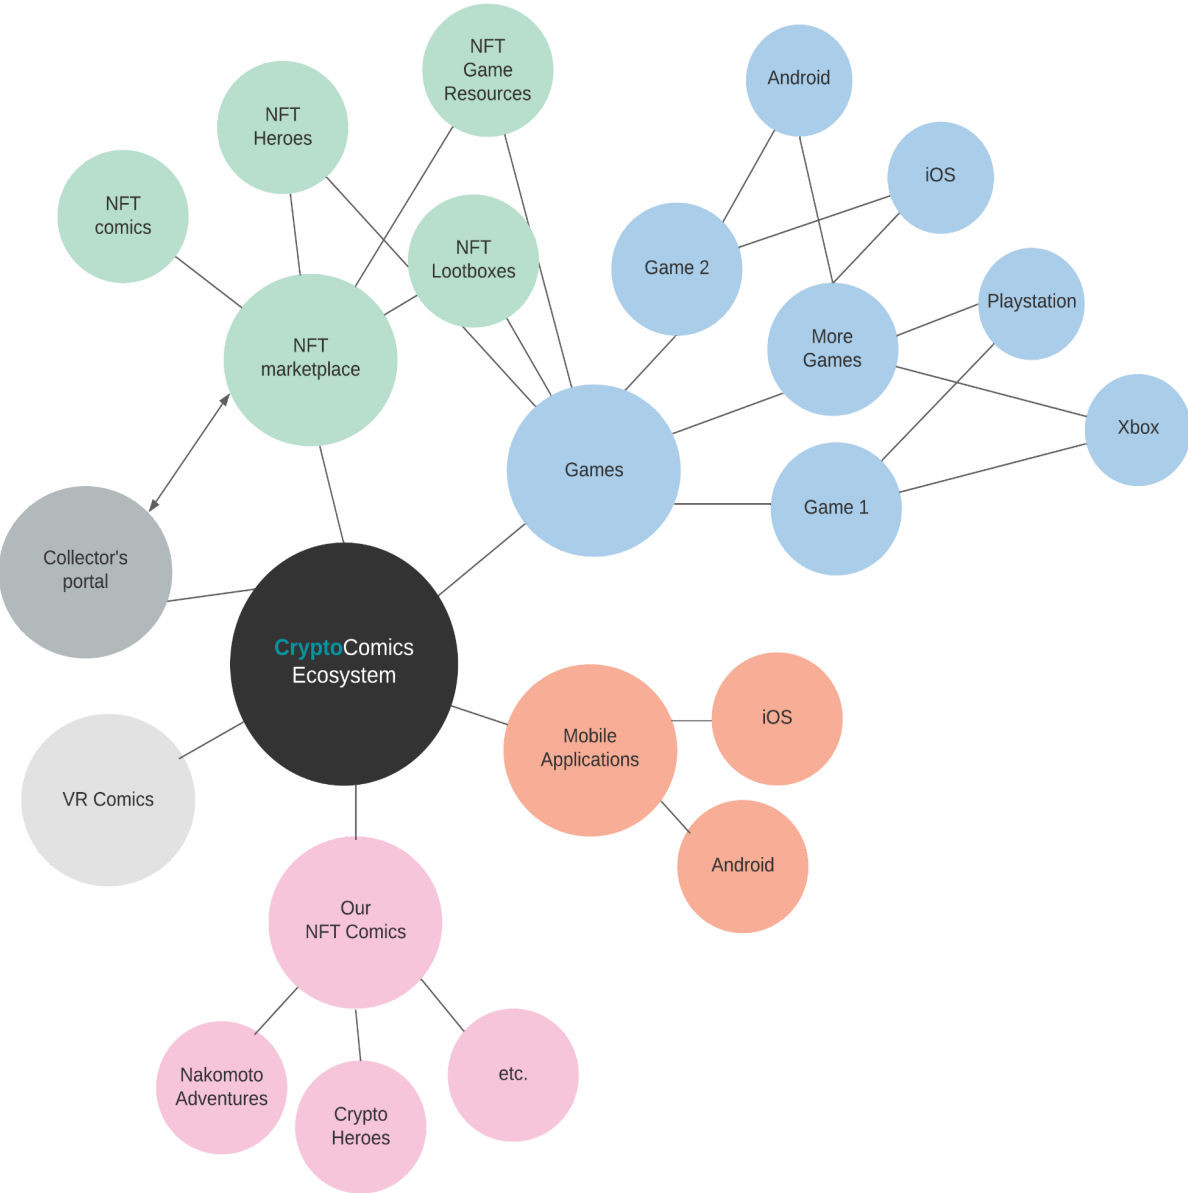

### 2.2 Services

The following services will be developed in the ecosystem:

- NFT comics and NFT cards of protagonists marketplace
- NFT comics Collectors portal
- mobile applications for NFT comics watching and reading
- comics series created by community and **CryptoComics** authors
- games with comics protagonists
- VR comics

So visiting the **CryptoComics** users will be able to purchase, read, share comics, play games, earn money and much more.

**Ecosystem diagram**

## 2.2.1 NFT Marketplace

We are creating a marketplace that will connect creators and sellers NFT (Non-Fungible Tokens) with buyers and interested users.

NFT tokens for the marketplace will be split into categories:

- NFT Comics
- NFT Heroes
- NFT Lootboxes
- NFT resources for games and other **CryptoComics** projects

The marketplace will provide access to the NFT catalog splitted by sections and categories, statistics and ratings.

Users will have easy and quick access for following information:

- Top NFT for periods: 24h, 7d, 30d, All time, according to trading volume
- NFT gainers
- Upcoming comics releases
- NFT search
- NFT lists by sections, categories

Each NFT will have information about:

- creator
- owner
- sales history
- trading volume
- details about NFT and collection/series

Comics authors can create their own NFT comics in just a few clicks and start selling. During the NFT comics creation process, it will be possible to specify many settings based on which a new Non-Fungible token (NFT) will be generated.

Some of the settings (*but not limited to them*):

- NFT ERC721 or ERC1155 type
- Available for sale release

- Selling price
- Author's resale commission
- Collection/series
- Comics name
- Description
- Preview pictures
- Comics pages

The marketplace will allow NFT owners to create referral/sponsored links for affiliates with a referral commission. After sale through such a link, the partner will receive his commission.

### Marketplace economic

Currencies we'll be working with: **ETH, CCM token (CryptoComics token)**

Marketplace commission 10% from sales, **and for CCM token holders 5%**.

The NFT author will be able to set his own % of income from each resale.

### 2.2.2 Collectors portal

Collectors portal will unite comics owners in the one community. Also, the portal will give the abilities to view all your collections of NFT comics, read them, exchange comics with other owners, or sublet your NFT comics and earn on it.

### 2.2.3 Mobile apps

For the convenience of users, applications for mobile devices on iOS/Android platforms will be developed.

Everyone will be able to access all our main resources from their phone/tablet.

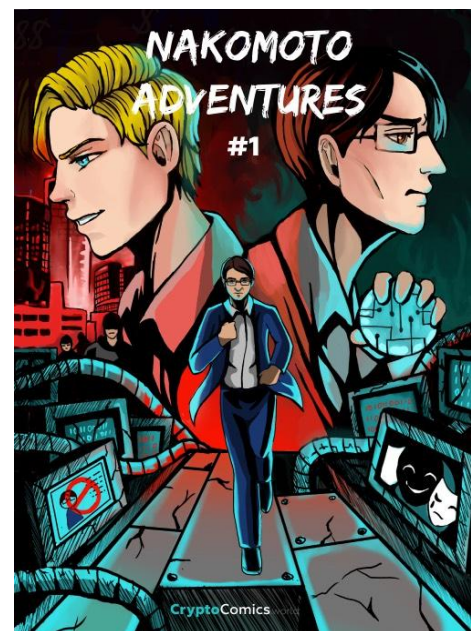

## 2.2.4 Comics series from **CryptoComics**

As part of the project, we will develop and publish our own series of comics. Will create our own metaverse of heroes with their own adventures and challenges.

Through comics, we plan to popularize cryptocurrencies to the masses, so the stories will be closely related to cryptocurrencies and the struggle between the old corrupt financial system and decentralized finance. We are sure that you will like it, because it will be amazing and engaging stories.

First series will be:

- Nakomoto Adventures
- Crypto Heroes

## 2.2.5 Games with comics Protagonists

For the interactive entertainment lovers, a series of games will be developed for different platforms: Web, Android, iOS, Playstation, Xbox, as well as for VR/AR.

We try to ensure that each game will use the **Play2Earn** model and players will not only enjoy the game, but also could earn the money.

The in-game economy will be based on the **CCM token and the active use of NFT.**

The main basic principles that we plan to follow in each game:

- use CCM token;
- connecting game NFTs with heroes/characters, loot boxes and resources;
- opportunity to earn playfully;

## 2.2.6 VR Comics

VR and virtual reality helmets such as Oculus Quest 2, HTC Vive and others are gaining more and more popularity. Therefore, we plan to conquer the VR entertainment market and develop interactive comics for VR. It will be an absolutely new, exciting and amazing comics reading experience.

You can feel like a hero of the story and get a lot of new and pleasant impressions.

## 3. Token & Tokenomics

Token name: **Crypto**Comics Token

Platform: Ethereum

Ticker: CCM

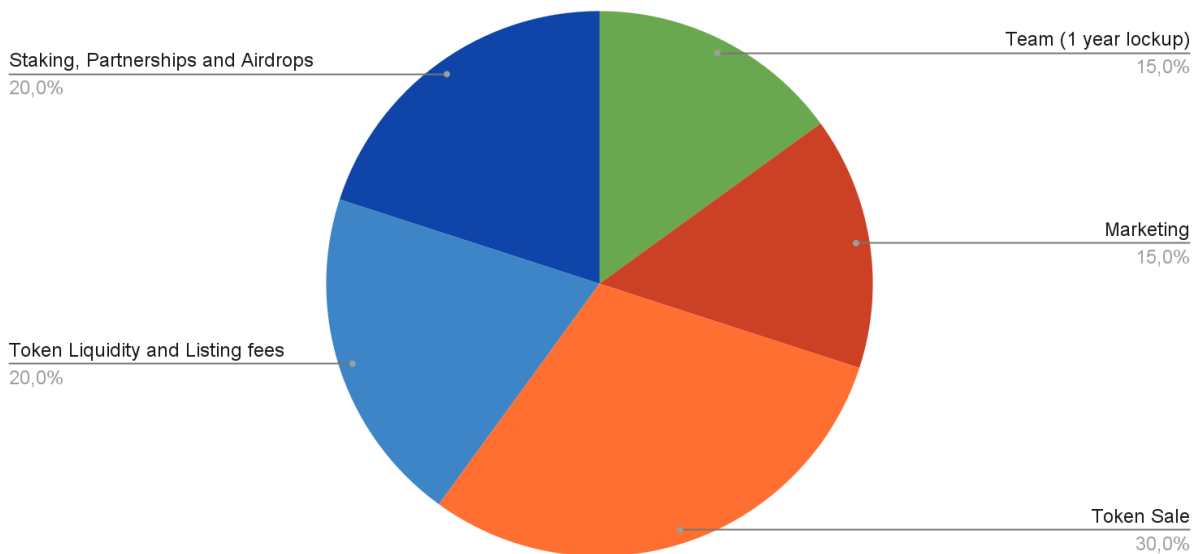

Max supply: 1 000 000 000

Standard: ERC20

The entire economy of the **Crypto**Comics ecosystem will be built on the basis of the CCM token. In each our service will be possible to use the token for payments or earnings and to reduce commissions.

## Token Allocation

## 4. Partners

We are actively working on attracting partners. Among our potential partners we see such companies as Marvel, DC, Disney, Dark Horse and other comics publishers.

Also, we plan to involve popular games in partnership and release new comics based on them.
